Deep learning ,python
Dr.kargar
- Developed and implemented deep learning models using Python, resulting in improved accuracy and efficiency in image classification tasks.
- Collaborated with cross-functional teams to design and deploy deep learning algorithms, resulting in the development of innovative solutions for complex business problems.
- Optimized and fine-tuned deep learning models by leveraging advanced techniques such as transfer learning and hyperparameter tuning, resulting in significant performance improvements.
- Conducted thorough data analysis and preprocessing, utilizing Python libraries such as TensorFlow and Keras, to ensure high-quality input for deep learning models, resulting in enhanced model performance.
